Which site are you using for the photos? I was testing but did not see any exclusive images for the 11108 site.

Kris,

I added the TEDD user to the contact list. You can go in to the edit screen to look at the user but you cannot make any changes or save because "TEDD" is not a valid email address. This is also why you could not add TEDD as a contact.

This should work although I'll try it out just to make sure.

Please let me know if there is anything else you need.

Kris,

Hold off on changing the credentials. That should work but it'll be neater if I add a contact through the backend for the TEDD account. Right now, it is not possible for you to add the TEDD oData account as a contact. Also, you cannot edit the contact once I've added it.

I'm working on it right now.

**Subject:** Re: TEDD account OData

Kris,

I'm looking at the site and it appears that you cannot add the TEDD account and give it exclusive rights. That would probably be the best way to do it. Right now, since you are only concerned with a single site, just use the credentials for a user with exclusive access such as yourself.

I'll have to look into adding the TEDD account to your site and see why that is not working.

If I remember correctly, we didn't allow the oData feed to pickup "exclusive" content as these are things that the OSC does not want to publish and the oData feed is specifically to publish content wider.

I'm not as familiar with the Tedd account so I don't know if Len did anything special to it but usually username = email address.

On the odata screen cap it just said Tedd.

Not Tedd@weston.

Maybe trying using the Tedd Weston email credentials with odata?

Yes I believe Tedd has default view private rights.

Check the view exclusive box on the Epaosc site for the Tedd contact and you should be good

Can you login into the Epaosc site directly with the Tedd credentials and see the site?

Hey friendly ERT team, we are trying to use the TEDD account to pull photos through the Odata feed from the R6 Gold King site, but it seems to not have access. I've also tried adding TEDD as a contact, but still no luck.

Any ideas?
